Schneider Electric was looking for a new security badge provider when a new visitor management process was suggested to them.

“We used to lose almost twenty visitor badges a month at \$12 each, now we lose 1-2 a month.”

- Robert Bennett, Maintenance Manager, Schneider Electric

About

Schneider Electric a global specialist in energy management and automation with operations in more than 100 countries.

They specialize in electricity distribution, automation management and produce installation components for energy management.

Challenges

Schneider Electric wanted a visitor management solution to take pressure off their front door guard and to replace a manual sign-in log in their front foyer.

Schneider Electric needed a system that would:

- *replace their manual visitor sign-in book*
- *make sure visitors could easily sign-in and out of their site without a receptionist*
- *see large groups sign-in at the same time, smoothly*
- *pre-register guests*
- *pre-print visitor badges*
- *let their people know when their guests have arrived on-site*
- *do all of this at a reasonable price*

"WhosOnLocation is a good product at a good price that works well."

How WhosOnLocation helped

Schneider Electric chose to implement WhosOnLocation as their employee, contractor, visitor and evacuation management system after hearing about it from their visitor badge supplier.

WhosOnLocation was easily implemented at Schneider Electric, where visitors can now sign themselves in and out without the help of a receptionist.

Schneider Electric uses their WhosOnLocation software to:

- *let staff scan in and out of site using their **barcoded ID cards** at a WhosOnLocation **kiosk**, or by using **WolMobile***
- *sign multiple people in and out of their site at the same time*
- *easily keep track of who is on-site with their WhosOnLocation dashboard*
- *issue their visitors with a barcoded tag and red lanyard so they are easily identified, using WhosOnLocation's **Visitor Pass***
- *make sure any contractors and employees on-site have been properly inducted using WhosOnLocation's **Induction Management**.*

"We had a very large executive visit by 60 of our top people, it was easy to pre-register and print their badge and have them ready for them when they showed up."
